

## Group 2

Peer tutor Name: ARTHUR Frank Essoun.

Course: Mobile App Development.

**Aim of the Project:** To develop an application that enables people to link up and services in the form of mentorship and self-advertisement. Establishing an easier, more technological way for people that to order food of their choice.

**Requirement Gathering:** This document content is geared towards the development, launching and marketing of the product.

**Business Requirement or Mobile app requirements:** This outlines how the product will address the needs of the its users. The Purpose of the app is to facilitate food delivery and communications between consumers and vendors.

**User Journeys (Admin and regular user):** The app should be configured in a way that the admin has total access to the information and databases of the app, that a regular user has access to the app but limitations concerning the databases and servers of the app.

**Product's Vision Statement:** Are you hungry? Do you want your favourite dish or delicacy right before you on your table? Look no further. Instal our FOOD SPOT app and order right now. Lets fill that hungry belly now!!!
